

Press release

The *Institut Nacional Andorrà de Finances* informs of the situation of Banca Privada d'Andorra, SA, which was intervened last Wednesday.

In the frame of the intervention of BPA by the INAF, the bank has attended its clients today with a special reinforcement of the internal control procedures in prevention of money laundering in order to ensure the correct processing of all operations. As previously mentioned, this fact has been generating some delay in the ordinary bank operative and the comprehension of all the clients and employees for any inconvenience caused is appreciated.

We inform that during today all internal procedures necessary to complete all the operations made between Andorran banks have been achieved. Consequently, the INAF confirms that next Monday 16 March, clients will see that their orders issued during these last days will have been executed.

The INAF and the Government are acting in view of a good evolution of the situation of BPA and they confirm the correct functioning of all the banks operating in the Andorran place.
